## AI PRODUCT MANAGER | TECHNICAL PM · LLMS · AUTOMATION

AI Product Manager with 5+ years designing, shipping and scaling AI products in production. Hybrid product and engineering background (TypeScript, React, Python, LLMS), with hands-on expertise in LLMS (OpenAI, Claude, LangChain), evaluation pipelines, and automation. I combine product vision, ground execution and collaborative leadership to turn AI into measurable business value.

Available

## EXPERIENCE

### Solutions Engineer – AI & Technical Solutions

#### Hubway.ai

October 2025 – Present | Lyon, France

- Owned the product roadmap of an AI conversational agent deployed across 5+ international airports, from discovery to production.
- Built evaluation pipelines (prompt testing, accuracy tracking, user feedback loops) to continuously improve LLM response quality and passenger satisfaction.
- Partnered with engineering to ship new AI features (semantic mapping, context memory, multi-language support), prioritizing backlog based on real user insights.
- Acted as the bridge between product, engineering and clients, embedding AI capabilities into live, high-traffic environments.

### Project Manager & AI Automation Lead

#### Flash Design

September 2024 – September 2025 | Barcelona, Spain

- Managed 100+ web projects end-to-end across design, SEO and dev teams, owning delivery, client relationships and quality.
- Designed and deployed AI workflows (OpenAI, Zapier, Make) that cut delivery time by 20% and project tracking time by 30%.
- Built internal tools in Airtable/Notion to structure backlog, priorities and reporting across the whole agency.
- Led cross-functional collaboration between business, design and engineering to maximize delivered value per sprint.

### Front-End Developer & AI Product Builder

#### Sea View Lab

March 2023 – August 2023 | Remote / Lyon, France

- Co-built an AI SaaS from scratch with intelligent workflow agents, improving client process efficiency by 40%.
- Contributed to product strategy, UX and the AI feature roadmap alongside founders and engineers.
- Designed LLM integrations (OpenAI, LangChain.js) at the core of the product experience.
- Developed the front-end in React/TypeScript to ship new AI features fast and iteratively.

### Mobile Developer

#### Advantys (WorkflowGen)

April 2021 – April 2023 | Remote

- Built React Native features for an enterprise app used by thousands of users worldwide.
- Reduced critical production bugs by 25% through architecture improvements and test coverage.
- Collaborated with product and QA on backlog priorities, release cadence and user feedback loops.
- Contributed to the technical roadmap in an Agile/Scrum environment.

## SKILLS

### Product

Product Strategy, Roadmap, Agile, Scrum, OKRs, A/B Testing, User Research, Backlog Management, Stakeholder Management

### Engineering

TypeScript, Python, React, React Native, Next.js, JavaScript, HTML/CSS

### AI & Automation

OpenAI API, GPT Agents, LangChain.js, Prompt Engineering, Claude (Anthropic), Claude Cowork, Codex, Cursor, Zapier, Make.com

### Tools

Figma, Notion, Airtable, Linear, ClickUp, Miro, Supabase, Firebase, Git

### Languages

French (Native) · English (C2, Cambridge) · Spanish (Intermediate)

## EDUCATION

### Master's Degree in Computer Science

EPITECH | 2020–2025 |

RNCP Level 7 (Bac+5) Specialization: Artificial Intelligence

### European Baccalaureate (Economics)

Assomption Bellevue, Lyon
